Opportunities to be Enterprising?

Dr Anne Miller
Enterprise Programme Manager

anne.miller@mpls.ox.ac.uk
Enterprise Skills & Training

1. What is enterprise and entrepreneurship?

2. Why might I be interested in it?

3. How can I get involved?
Enterprise:

“any kind of complex project or undertaking with a defined goal for which the route to reaching it has uncertainties” (Vitae, 2014).
Key enterprise skills

• creative thinking, team working, presentation, design, planning and communication
• learn how to take an idea, develop it and build a viable business model
• cultivate a proactive 'can do' mindset
• become more employable
• do something new and have fun!
Entrepreneurship

Being entrepreneurial is:

– having the ability to see and develop opportunities
– bringing innovation into an organisation
– working creatively

Often think of it as commercialising research but not the only path to being an entrepreneur

Can be in small or large organisations, for profit or not for profit (social enterprises)
