PTO for a note on the Project Management Scheme and the quarterly GSR Reports

A note on the Project Management Scheme and the quarterly Graduate Supervision Reporting (GSR) Reports

The quarterly GSR Reports by student and supervisor(s) are a mandatory requirement of the University.

The project management scheme is intended as a tool to enable and encourage the student to take ownership of their project and to maximise their chances of submission within their funded period. It also enables the development of a valuable 'career skill'.

Other than requiring a project management review by student and supervisor at six-monthly intervals the Department is not prescriptive in exactly how student and supervisor make best use of the project management scheme.

However, one model that can be effective and efficient is:

Student inputs their quarterly GSR report to the on-line GSR system in weeks 7-9 of each term and by mid-September in the Long Vac.

Following this submission, and **prior** to submission of the **supervisor's**** GSR report, it is best practice for the supervisor(s) to meet with the student to discuss the student's progress and GSR report. We shall call this the 'GSR Meeting'.

** From 2018/19 onwards the University has set a **strict four-week window** for this supervisor's submission; for example, week 10 of MT to week -1 of HT.

At the two such GSR meetings in each of years one to three that will **precede** a PMF submission[#] it is logical to review the student's project management and Gantt chart (that is, in advance of the next formal PMF update by the student).

By means of a single sentence in their GSR report the supervisor can confirm that this project management review has taken place. Since our PMF includes a section on training needs, this will meet the Divisional steer that the GSR process includes 'Training Needs Analysis'.

Having read the supervisor's formal GSR report, and in the light of the discussion at the most recent GSR meeting with their supervisor(s), the student is well-placed to capture by means of the PMF a review of their project management (including training needs) and revision of their Gantt chart ready for the imminent PMF submission[#] to the 'Materials: PGR Progression' on-line site.

For the two quarterly GSR reports per year that do **not** precede a Materials six-monthly project management review the Department will **not** expect a training needs analysis to take place. Unless student or supervisor(s) need to raise concerns, typically these two quarterly GSR reports will be very light-touch and even may not involve a GSR meeting.

[#] For a student following the 3.5 year DPhil in Materials programme, the two occasions in each of years one to three when the GSR meeting will precede a PMF submission are the Weeks 0-1 HT and July PMF submissions. The same approach could be taken for the PMF4 submission in Weeks 0-1 of MT Y4.
